

# Forestry Work

## Bishops Wood Country Park

### September/October 2014

**Forestry works will start shortly in this woodland.**

They are part of the 5 year restoration plan for Bishops Wood. Trees, mainly conifers, in selected areas will be 'thinned' out to let in light and help native trees grow. The ride from Shrubs Road will be widened by removing selected trees to let in light for wild flowers and insects.

**These works involve large machinery.**

***Some areas, including the car park, may be closed at times for public safety.***

Works start approx 1st Sept and are expected to take around 3 weeks.

**Please follow notices on site at the time.**

Later in the year work will take place to improve access to woodland. Details will follow nearer the time.

**For further information call 01992 556466.**
