INTRODUCTION

The progress of this service plan will be monitored in the following ways:

- Through regular discussion at corporate (CMT) and departmental management team (DMT) meetings and logged in the version control section of this document
- Performance indicator monitoring by the Council's Corporate Leadership Team on a quarterly basis
- By Committee reports twice a year (at the end of quarters two and four)

Service Plans will be formally updated on an annual basis, taking into account internal and external influences arising from monitoring arrangements throughout the year.

2.1.2 Performance indicators

Performance indicators are used to aid the decision making process as well as assess the efficiency and effectiveness of service delivery. The data that we use must be accurate, reliable and timely. To meet these requirements we have adopted the Audit Commission's Standards for Better Data Quality. Further details of the Council's commitment to data quality can be found via the link above.

EHC05	Food establishments in the area which are broadly compliant with food hygiene law.	REPORTED ANNUALLY	95%	95%	95%	95%

The Head of Regulatory Services is responsible for the source data, data entry and checking the data. The purpose of collating this data is to ensure that our services improve.

NOTES:

EHC01 - To report on the number of primary food hygiene inspections that are carried out within 3 months of the date of opening. A full unannounced inspection of a new food business should take place within three months of the date the business starts trading. In many cases, including those where the business hasn't proactively registered, or registers after starting to trade, the inspection should take place within 28 days. Within the 3 month period it is also likely an advisory visit would have occurred to assist the new business.

EHC02 - This performance requirement is a national one and we are required to report this to the Food Standards Agency annually. Category E premises are the very lowest risk premises and are subject to self-assessment by questionnaire. Every year we verify a random 10% of self-assessment returns for quality control purposes. They include sweetshops and small retailers, childminders and some home caterers making cakes etc.

EHC04 - An urgent, possibly immediate response may be required for serious incidents. These include infectious disease outbreaks, emergency closure of a failing food business, a work related injury or death at a workplace where the Council is the enforcement authority, not the Health & Safety Executive

EHC05 - This is a national indicator which is reported to the Food Standards Agency every year. In terms of hygiene ratings (scores on the doors) it means a rating 3, 4 or 5 has been awarded.
